REMARKS:

25X1D

[REDACTED] photography covering the area between Koton and Valza shows a railroad under construction between these two points, which are situated 40 miles apart. The roadbed appears to have been completed but construction of several bridges and the laying of rails had not begun at the time of photography. Reports that this railroad is under construction as far as Derbinskoye, 35 miles north of Valza, cannot be confirmed because of lack of photo coverage.
